Madison Porter

Full Stack Web Developer

Eager, creative, and passionate. My background in the service industry advanced my problem solving skills in a team setting and absorbing knowledge quickly. I am a natural leader and enjoy using my unique creativity to shine as a collaborator and as an individual. I relish connecting strong back-end development to innovative front-end ideas.

PERSONAL PROJECTS

Beer Snob
- A React application used to search your favorite food to pair with the perfect beers. Using the the Punk API, featuring Laughing Dog Brewing.
- beersnob.surge.sh
- Made with React, JavaScript, HTML, CSS, Photoshop

Swap Meet
- A full-stack application and free resource for independent contractors and freelancers to connect with one another to swap services and keep track of their trades.
- https://swap-meet-for-freelancers.herokuapp.com/
- In collaboration with another classmate.
- Made with Express, MongoDB, Node.js, React, JavaScript, HTML, CSS, Photoshop

Takashi Website
- A website dedicated to one of Salt Lake City's most favored restaurants. I used this project to highlight CSS design and HTML.
- http://www.takashi.surge.sh
- Made with HTML, CSS

DJ JavaScript
- A fun and interactive website highlighting JavaScript with CSS tools.
- http://djmadwuz.surge.sh
- Made with JavaScript, CSS, HTML
